REVIEW AND APPROVAL STATEMENT

USAFETAC/PR-81/001, Mean Annual Snowfall at Air National Guard Bases, April 1981, is approved for public release. There is no objection to unlimited distribution of this document to the public at large, or by the Defense Technical Information Center (DTIC) to the National Technical Information Service (NTIS).

This project report has been reviewed and is approved for publication.

20. ABSTRACT (Continue on reverse side if necessary and identify by block number) This summary includes mean annual snowfall values for 138 Air National Guard bases in the United States including Puerto Rico, from 1950/51 to 1978/79 season.		

PREFACE

The USAF Environmental Technical Applications Center (USAFETAC) prepared this summary in answer to a request from the USAF Air National Guard Support Center at Andrews AFB, Maryland. This summary is an update and expansion of a previous summary prepared at USAFETAC in December 1974.

At the end of this summary is an Appendix which lists every station's annual snowfall by season. These individual listings provide data for future updates to this document.

Significant contribution toward the completion of this report was made by Miss Cheryl Schaus.

MEAN ANNUAL SNOWFALL
AT AIR NATIONAL GUARD BASES

This summary includes data for Air National Guard (ANG) bases in all fifty states of the United States including the District of Columbia and Puerto Rico.

The data used in preparing this summary came from several sources: the local climatological data-annual summaries, 1979 edition; the state climatological data, July issues; and the Revised Uniform Summary of Surface Weather Observations (RUSSWO). The National Climatic Center, National Oceanic and Atmospheric Administration (NOAA), Asheville, North Carolina, produces the local and state climatological summaries and Operating Location A (OL-A), US Air Force Environmental Technical Applications Center (USAFETAC) produces the RUSSWOs.

The period of record of the data used in this summary is 1950-51 to 1978-79 for most stations. Some stations may have a shorter period of record depending on when snowfall measurements began at the particular station.

The annual totals presented here represent the snowfall season, July of a given year through June of the following year.

The locations in parentheses in the summary have been substituted for the Air National Guard base in those cases where no snowfall data were available for that base.
